

**Website Project Subject:** Freelance Web Development Portfolio

**Brief Description of Planned Site Content:** The website will serve as a portfolio showcasing my freelance web development projects, skills, and expertise. It will include sections such as:

- Homepage: Introduction to my services and a brief overview of my skills and experience.
- Portfolio: A gallery showcasing my previous web development projects, including descriptions and links to live websites (if available).
- Services: Details about the web development services I offer, including website design, development, maintenance, and customization.
- About Me: A section providing information about my background, experience, and qualifications in web development.
- Contact: A contact form and my contact information for potential clients to reach out to me for inquiries or project requests.

**Reason for Choosing this Subject:** I chose to create a website for my freelance web development portfolio because it allows me to showcase my skills and previous work to potential clients. Having a professional online presence is crucial for attracting clients in the competitive field of web development. This website will serve as a platform for me to highlight my expertise, demonstrate the quality of my work, and ultimately, attract more freelance opportunities. Additionally, having a central portfolio website makes it easier for clients to find and learn about my services, increasing my visibility in the market.
